COLLECTION OF DECORATIVE  
SHEETS AND FRONTS

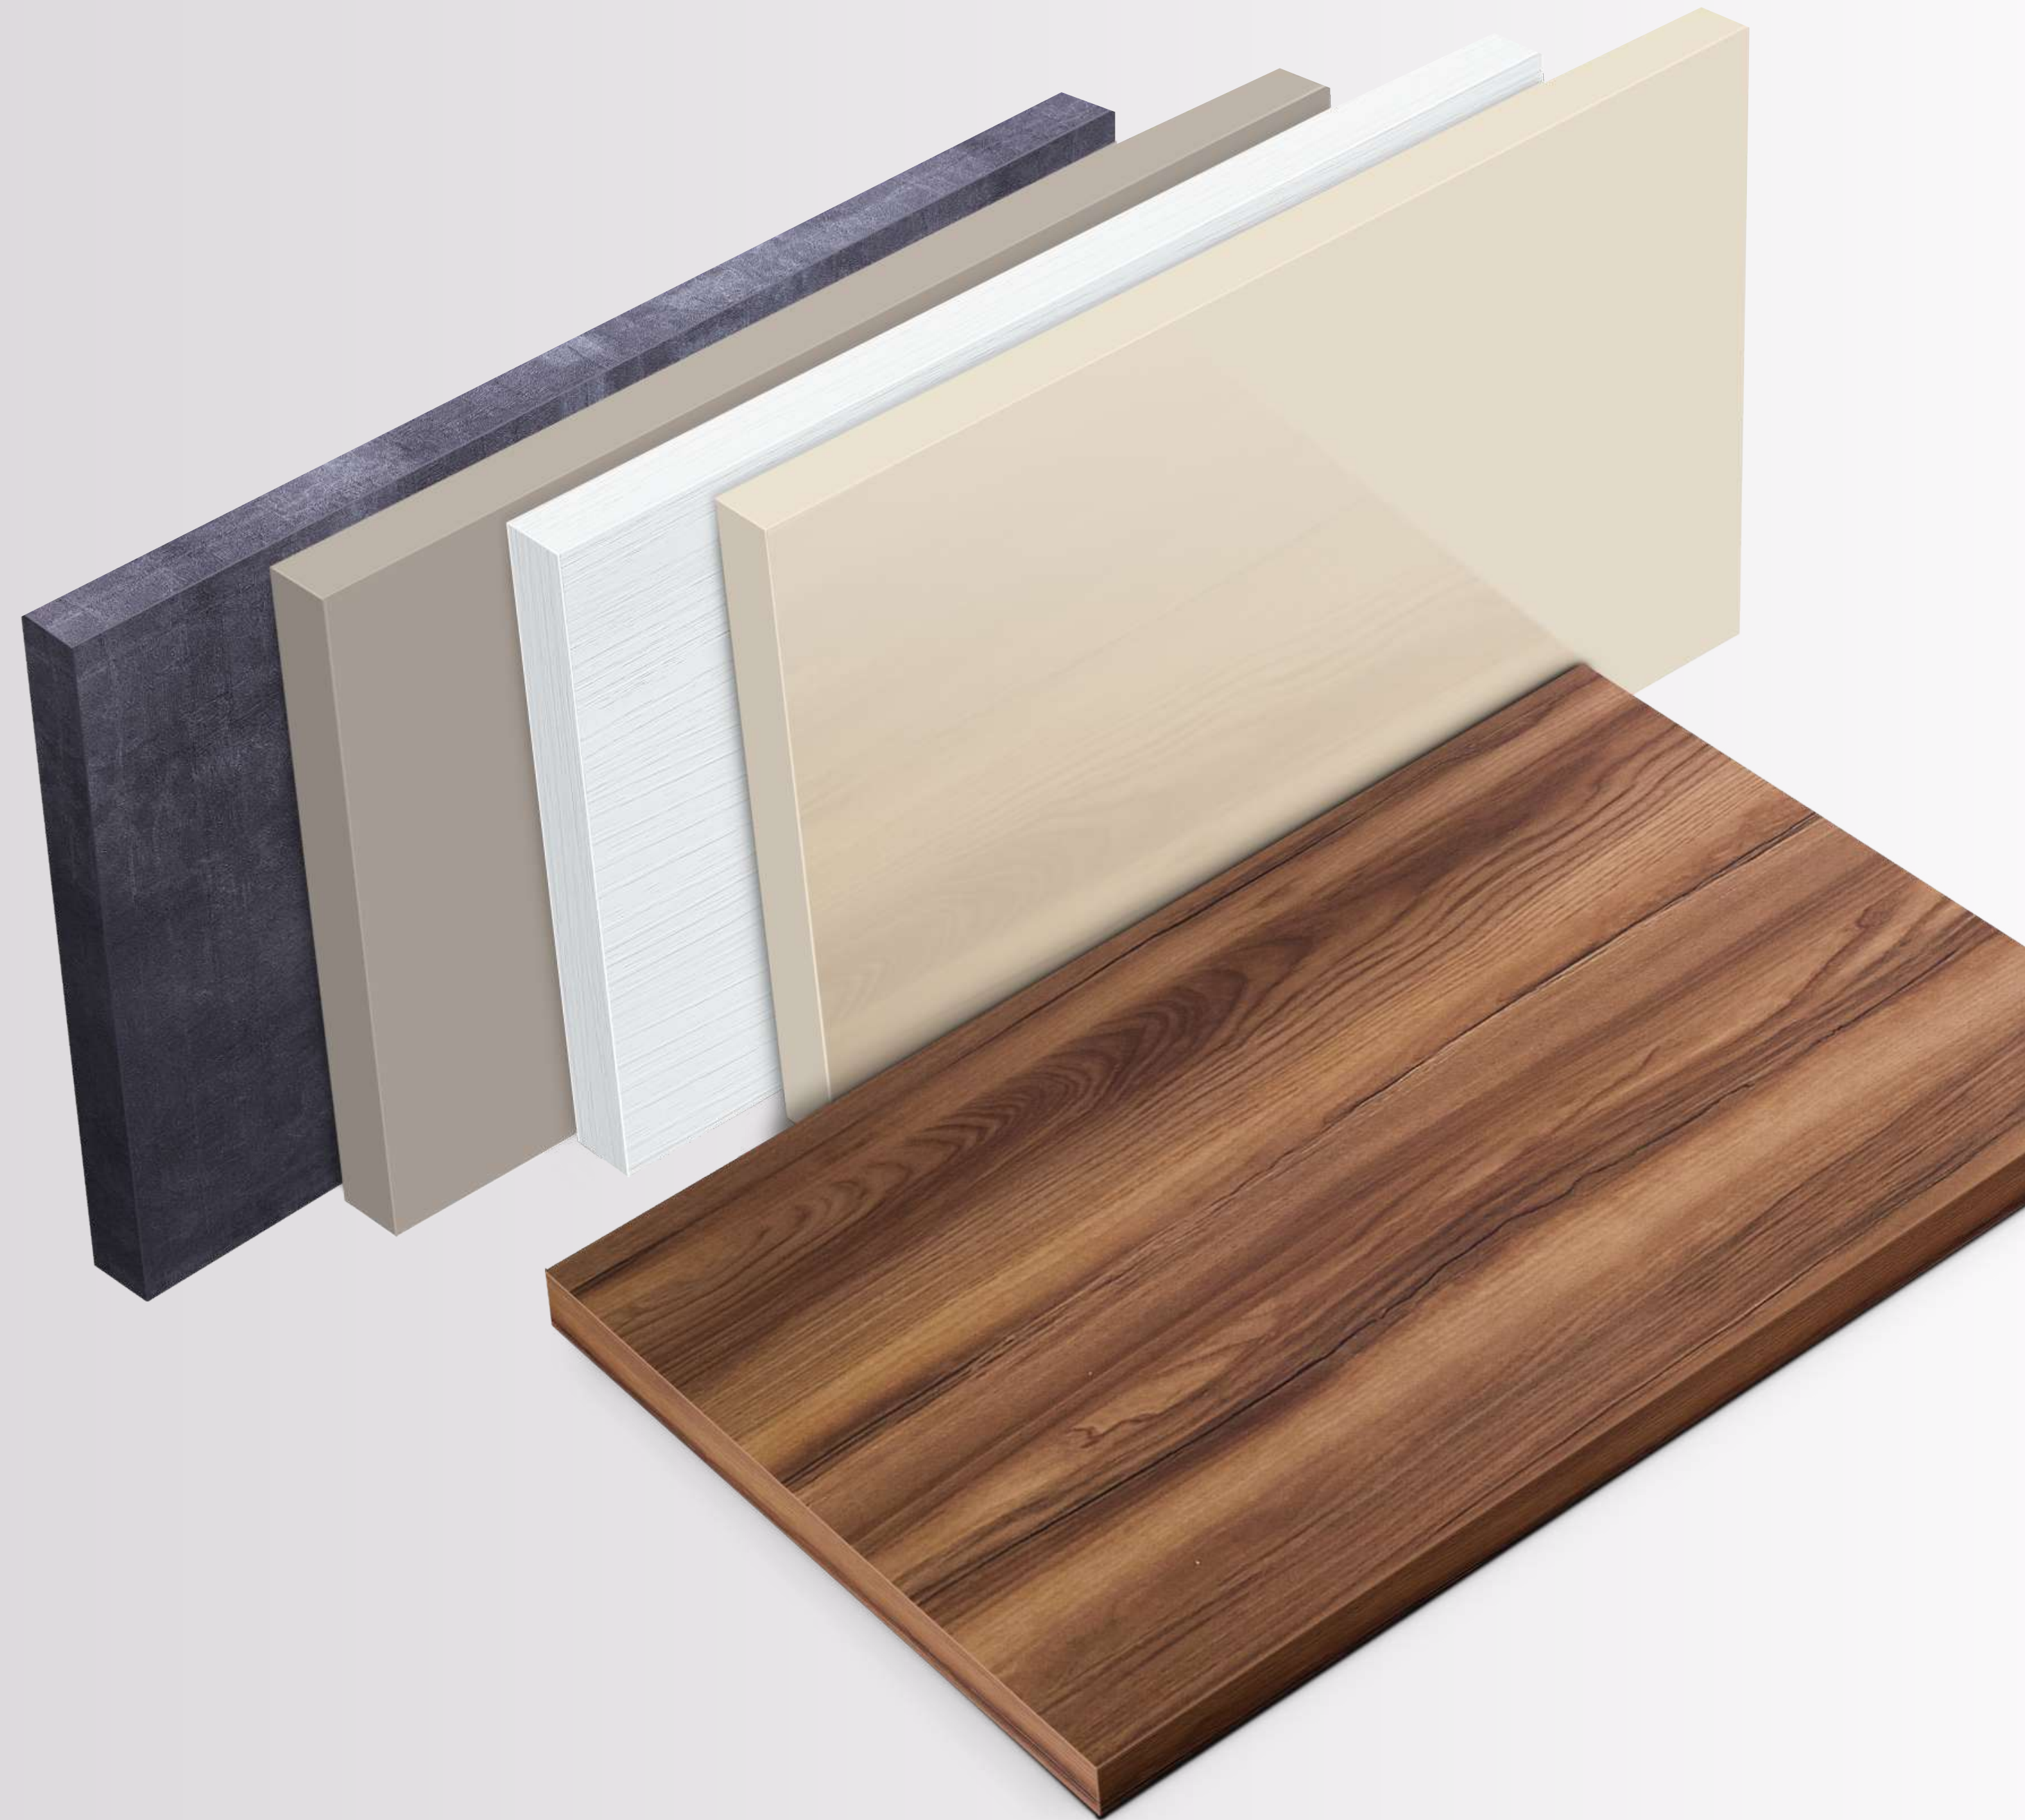

**LUXEFORM** SmartLine  
reliability in every centimetre

## RELIABILITY OF LUXEFORM SMARTLINE SHEETS AND FRONTS WILL FORM YOUR PERFECT LONG- TERM LIVING SPACE

The most popular shades given in both glossy and matte surfaces may become a perfect universal solution when creating design not only for the kitchen, but also for the bathroom, wardrobes, interior doors and any other furniture.

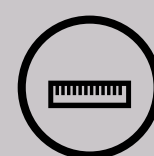

## FRONTS

Min. size:  
50 × 120 mm

Max. size:  
2780x1280

Thickness:  
17.7 mm (+/-0.2 mm depending on decor)  
10 mm (+/-0.2 mm depending on decor)

Perfectly selected edge  
by colour and texture

## CHARACTERISTICS

### Resistance to thermal impact (up to 60 °C)

the surfaces of this collection feature good thermal resistance by DIN EN ISO 306

### Moisture-resistant

owing to using polyurethane glue

### Material compliance with the established safety criteria according to DSanPiN 8.2.1-181-2012

all raw materials were completely tested for the compliance with specified medical indicators used during the production of furniture components

### European standard for gloss quality EN 17214:2017 (class 3, clause 1)

for glossy surfaces that comply with this standard,  
there are no visible contour distortions for the objects reflected

### The most popular decors that match modern trends

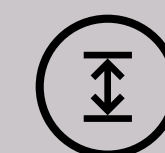

the collection comprises 4 glossy (GL), 4 matte (MT) and 7 texture (FN) decors

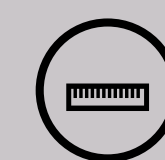

## PANELS

Dimension:  
2 800 x 1 300 mm (3.64 m<sup>2</sup>)

Thickness:  
17.7 mm (+/-0.2 mm depending on decor)  
10 mm (+/-0.2 mm depending on decor)

## CHARACTERISTICS

### Scratch resistance

SmartLine surfaces have additional protective coating against scratches, both for glossy and matte decors

### Easy to maintain

to maintain goods, it is enough to use multi-purpose liquid glass or dishware cleansers or non-abrasive paper towels

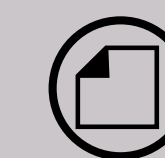

### Instant readiness to use

the product is ready-to- use after removal of protective film

### High-strength and moisture-proof back coating

significant moisture resistance is attained owing to moisture-resistant coating on both panel sides, application of polyurethane glue and quality edge in finished components

### All products are coated with protective film

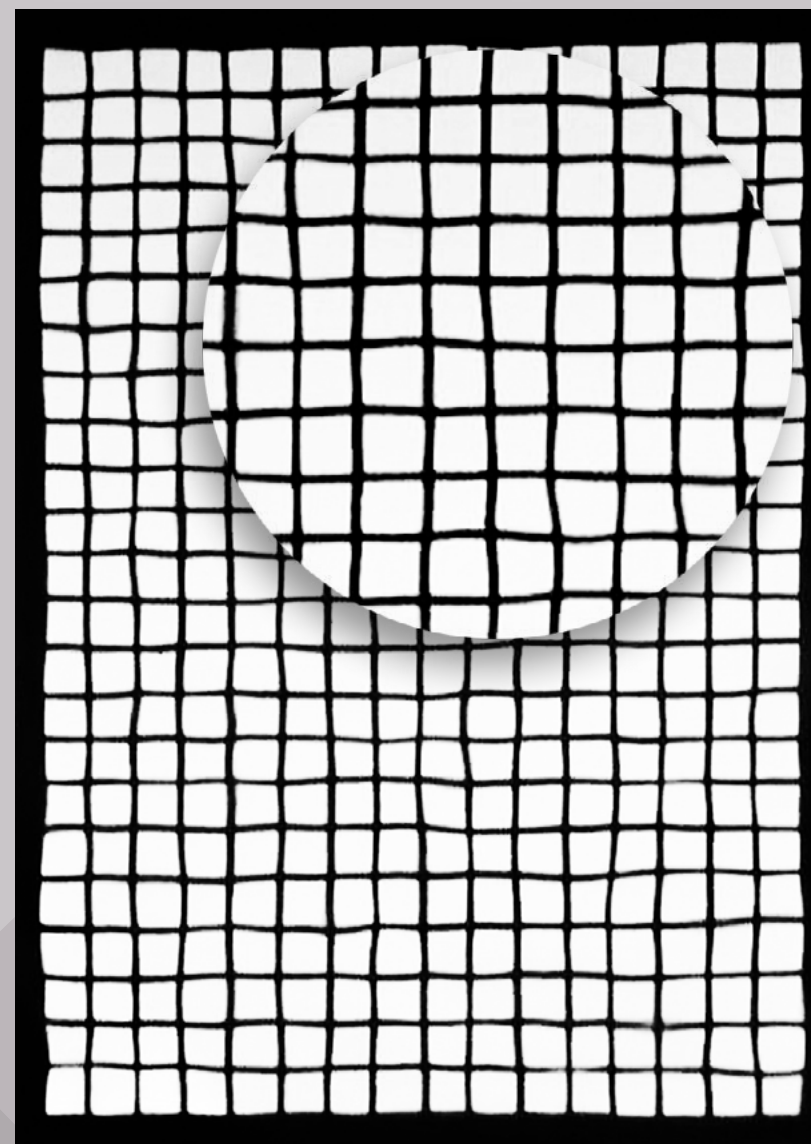

to prevent their damage during storage or transportation
